1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 13 and 18 are, drawn to a parametric equalization curve generation device, classified in class 381, subclass 120.
- II. Claims 14 to 17 are, drawn to providing equalizer presets for a speaker type, classified in class 381, subclass 103.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because equalization presets of group II can use any equalization presets. The subcombination has separate utility such as any equalization presets can be used for generating an equalization of group II.
